If an employee's body temperature is at or above 100.4 degrees Fahrenheit, the employee must be sent home immediately and the following completed:

Date the employee was sent home: ______________ Recorded temperature: ______________

Are visible signs of respiratory illness present? _____ Yes    _____ No

An employee sent home with a fever can return to work when:

- He or she has had no fever for at least three days without taking medication to reduce fever during that time; AND
- Any respiratory symptoms (cough and shortness of breath) have improved; AND
- At least ten days have passed since symptoms began.

The employee may return to work earlier if a doctor confirms the cause of the employee's fever or other symptoms is not COVID-19 and provides a written release for the employee to return to work.

Date the employee returned to work: ____________________
